Maybank AM launches Shariah-compliant retirement solution

Pandemic prompting Malaysians to save more for retirement

The Asset
15 Feb 2022

Maybank Asset Management has launched a Shariah-compliant flexible retirement solution that allows Malaysian investors to supplement and diversify their retirement planning.

The Maybank Flexible Retirement Solution offers investors the flexibility to choose and switch between two different funds and share classes to cater for their changing lifestyle and retirement needs, the company says. The mixed-asset funds include the Maybank Global Wealth Moderate-I Fund and the Maybank Global Wealth Growth-I Fund.

Maybank Global Wealth Moderate-I Fund is offered in two share classes, namely MYR-Hedged Accumulation and MYR-Hedged Distribution Class, while Maybank Global Wealth Growth-I Fund is offered in MYR-Hedged Accumulation Class. Investors can purchase units in the funds at a minimum initial investment of 1,000 ringgit (US\$238.72) and make additional investments at a minimum of 100 ringgit.

Schroder Investment Management (Singapore) is the investment adviser to the solution.

“Our 2021 Global Investor Study found that 80% of non-retired Malaysians would like to save more for their retirement because of the pandemic, and half of the respondents have not changed their expected retirement age,” says Lily Choh, chief executive officer of Singapore at Schroders. “As Malaysia’s first Shariah-compliant flexible retirement solution, we believe this offers Malaysian investors a unique proposition for their retirement needs.”
